Introduction:

The Department of Revenue encourages electronic filing however we neither support nor recommend any software company. You must address technical and support issues with the company whose product you select.

Types of Alabama Errors:

1. **Rejected Acknowledgment:** A “rejected acknowledgment” indicates that the electronic return was received and failed to successfully complete the pre-entry validation process.
2. **Business Rule Error:** The acknowledgement will contain an error rejection code number followed by a message indicating the condition causing the rejection.
3. **Schema Validation Error:** If the return is rejected due to a schema validation, only the schema validation error message will be displayed. This message will not contain an error rejection code number.

Under certain conditions the rejected acknowledgment will contain both an error rejection code number and a schema validation error message.
