Expenses incurred for or relating to instructors, materials, or equipment used in the qualifying program, or for supplies, textbooks, or salaries, including compensation paid to employees while participating in the basic skills program may be used in calculating the credit. The credit will equal 20 percent of the actual costs of education limited to the amount of the employer’s income tax liability. A credit will not be allowed for employers receiving reimbursement for any cost of the education.

Part C – Rural Physician Credit

Such tax credit shall be based on coal produced after January 1, 1995, provided the coal was mined in Alabama as certified by the producer of the coal. The amount of the total credit in any one year shall be based on the number of tons of Alabama coal produced by the corporation in the year which exceeds the number of tons of Alabama coal produced by the corporation in calendar year 1994. In the event a corporation did not produce Alabama coal during calendar year 1994, such corporation must establish a base year by producing Alabama coal for 12 consecutive months.
