COMMERCIAL MOTOR VEHICLE "ADD-ON" EQUIPMENT VALUATION PROCEDURES

INTRODUCTION

The values published in the Alabama Uniform Motor Vehicle Assessment Schedule for Property Taxes (Add-on Guide), issued by the Department of Revenue, represent the market value of motor vehicle cab and chassis only and do not include the equipment and bodies added to a vehicle after it leaves the original manufacturer. In these instances, the original manufacturer builds an incomplete vehicle (cab and chassis) and a secondary manufacturer or “upfitter” adds specialized equipment and/or bodies to the incomplete vehicle. These “add-on” or “added value” components are to be assessed as personal property.

PURPOSE

This guide was developed by the Personal Property Section in cooperation with the Motor Vehicle Valuation Section of the Alabama Department of Revenue. It is intended to be used by the county assessing officials and their staffs in the valuation of “add-on” equipment to certain commercial motor vehicles when adequate information cannot be obtained from the taxpayer for use in valuing the “add-on” equipment as you would any other item of tangible personal property.

LIEN DATE

Property taxes on motor vehicle cab and chassis are paid in advance at the time of registration. The property taxes on the add-on equipment on motor vehicles are paid in arrears; but not at the time of registration. The add-on equipment is to be listed on the Tangible Personal Property Return (ADV-40 form) and reported to the assessing official in the county in which the property has situs on October 1.

TANGIBLE PERSONAL PROPERTY RETURN FORM ADV-40

Add-on equipment to a motor vehicle is to be reported on the Tangible Personal Property Return and assessed in the county assessing official's office in which the property has situs as of October 1. Part A of the ADV-40 Return is to be used by the taxpayer to list all add-on equipment to motor vehicles if cost and acquisition date of the add-on is known. If the taxpayer is unable to provide the necessary information pertaining to the acquisition cost and acquisition date of the added bodies and specialized equipment, Part B of the return is to be completed. The data in this guide will assist in calculating the market value of the add-on equipment when Part B of the ADV-40 form is used by the taxpayer to report add-on equipment.

INTERNATIONAL REGISTRATION PLAN (IRP)

Vehicles with add-on equipment, having a tax situs in Alabama, must be reported each year on a Personal Property Return (ADV-40, Part B) filed with the assessing official in the county where they have obtained tax situs. The owner of registered International Registration Plan (IRP) trucks is responsible for providing documentation as proof of mileage traveled in Alabama for the value of the add-on equipment to be apportioned based on the percentage of travel in Alabama. To apportion value of the equipment, the total market value of the add-on should be calculated using the procedures in this manual. The value should then be reduced to the percentage of mileage traveled in Alabama for the current registration. Questions regarding IRP for add-ons may be directed to the Property Tax Division, Personal Property Section.

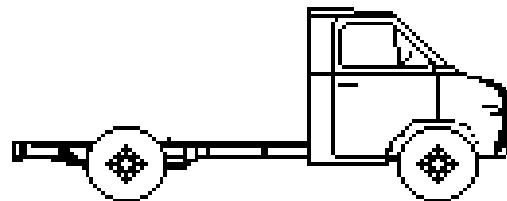

DEFINITIONS

The following words will have the meanings stated below when referred to in this guide.

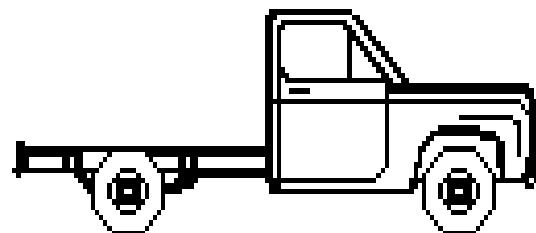

- A. **"Add-on" equipment** - any item added to the cab and chassis of a motor vehicle, either by the original manufacturer or a secondary manufacturer. Add-on equipment includes, but is not limited to: box type bodies, dumping mechanisms, wrecker rigs, refrigerated bodies, limousines, armored trucks and vans, cement mixer drums, refuse compactors, cranes, booms, propane and petroleum tanks, and flat beds. Other terms used to describe what is referred to in this manual as add-on equipment include: added value equipment, specialized equipment, truck equipment, and bodies.
- B. **Cab** - the shelter or enclosure provided for the driver of a motor vehicle where the steering column and seats are located.
- C. **Chassis** - the metal framework of a motor vehicle, embracing the engine and related machinery, running gear, and wheels.
- D. **Cab and chassis** - typically includes the frame (chassis), axles, wheels, engine, front sheet metal, and full cab. Original manufacturers produce several types of cabs and chassis. This portion of a motor vehicle is valued in the Uniform Motor Vehicle Assessment Schedule issued by the Department of Revenue.

TYPES OF CABS AND CHASSIS

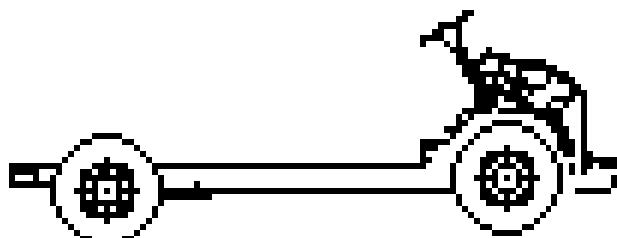

1. **“Cut- A- Way” Van Chassis and Cab** - is a van chassis and van cab with the rear of the van open. This area is usually “upfitted” with a parcel type or service/utility type body to complete the vehicle.

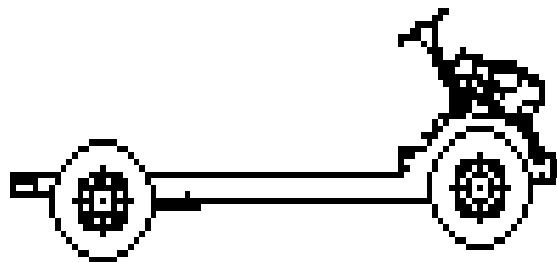

2. **“Standard” Cab and Chassis** - consists of only a truck chassis, engine, front sheet metal, full cab, with no rear bed or rear chassis covering, which allows for a secondary rear body to be easily added.

3. **“Chassis Cowl” Cab and Chassis** - Consists of a chassis, engine, front sheet, and fenders, with no cab. This allows for a secondary body, which includes a driver and passenger compartment to be added.

4. **“Stripped Chassis” Cab and Chassis** - consists of only the chassis and the engine and nothing else. This type of chassis allows for a full secondary body to be added.

- E. **Gross Vehicle Weight (G.V.W.)** - is the maximum total weight rating as determined by the manufacturer. This is the maximum the vehicle can weigh fully loaded. The G.V.W. includes cargo, fuel, and vehicle operators.

As a general rule, trucks with a gross vehicle weight of 10,000 pounds or less may have add-on bodies and trucks with a gross vehicle weight of 10,001 pounds and greater will mostly likely have add-on bodies.

F. **Vehicle Identification Number (VIN)** - 1980 began the use of the unique vehicle identification number established by The Federal Motor Vehicle Safety Standards (FMVSS) #115 of the Motor Vehicle Safety Act. The unique 17-digit (alphanumeric) VIN contains certain specific information pertaining to the manufactured motor vehicle. The standard covers vehicle identification numbers for multi-purpose passenger vehicles, trucks, buses, trailers, and incomplete vehicles. The unique 17-digit (alphanumeric) VIN has a few restricted digit locations for mandatory information.

The following chart indicates a few of the restricted digits locations in the vehicle identification number.

A V 2	J C A B J	3	R	R 1 2 3 4 5 6

Year Code
Designates Year of Manufacture

Vehicle Description Section (VDS)
1. Model Designation
2. Engine Information
3. Axle Configuration
4. Other

World Manufacture Identification (WMI)
1. Country of manufacture
2. Vehicle Manufacturer – make
3. Type of Vehicle (Truck, Bus, Incomplete, etc...)

The VIN is one of the best sources to use to discover if a motor vehicle has add-on or specialized equipment. The personal property appraiser can work with the county tag office to discover motor vehicles, which have add-on bodies and specialized equipment.

MODEL YEAR INDICATOR (10TH DIGIT)

The tenth digit in the VIN signifies the year the motor vehicle was manufactured. This digit can be either alphabetic or numeric. The following chart identifies the model years of motor vehicles manufactured from the year 1980 until the year 2039.

A	1980	Y	2000	L	2020
B	1981	1	2001	M	2021
C	1982	2	2002	N	2022
D	1983	3	2003	P	2023
E	1984	4	2004	R	2024
F	1985	5	2005	S	2025
G	1986	6	2006	T	2026
H	1987	7	2007	V	2027
J	1988	8	2008	W	2028
K	1989	9	2009	X	2029
L	1990	A	2010	Y	2030
M	1991	B	2011	1	2031
N	1992	C	2012	2	2032
P	1993	D	2013	3	2033
R	1994	E	2014	4	2034
S	1995	F	2015	5	2035
T	1996	G	2016	6	2036
V	1997	H	2017	7	2037
W	1998	J	2018	8	2038
X	1999	K	2019	9	2039

VEHICLES AND BODY TYPES LISTED IN THE GUIDE

1. **Automobiles.** The automobiles listed in this guide are generally those that have been converted for use as a limousine, hearse, or some other type of specialized commercial passenger vehicle.
2. **Vans.** The vans listed in this guide are cut-away vans that have been converted for use as ambulances, moving/storage vans, armored vehicles, or some other type of specialized commercial vehicle.
3. **Light Trucks.** This type of motor vehicle generally includes 1/2 ton and ¾-ton pickup trucks.
4. **Heavy Trucks.** This type of motor vehicle is generally referred to as trucks and truck tractors.

HOW TO USE THE GUIDE

This guide is to be used when the taxpayer is unable to separate the acquisition cost of add-on equipment from the total acquisition price of the motor vehicle. In this case, the taxpayer is to complete Part B of the ADV-40 form and provide the following information about the motor vehicle: the model year, make, model, tag number, complete vehicle identification number (VIN), vehicle description, acquisition date, and total purchase price. The appraiser will then use this information to determine what portion of the purchase price of the “completed” vehicle is attributable to an added body and/or the add-on equipment. Once the acquisition cost attributable to the add-on equipment has been determined, the appropriate composite factor is applied using a ten (10) year economic life.

This guide is to be used to value only add-on equipment as defined in this guide. Any type of portable equipment such as radios and cellular telephones that can be mounted inside of the vehicle must be valued using the standard procedures to value personal property.

CALCULATING MARKET VALUES FOR ADD-ON EQUIPMENT

The following are examples of how to calculate the market value for commercial motor vehicles using this guide.

Example #1 Purchase of a new commercial motor vehicle. (As of October 1, 2021)

Model Year:	2014
Make:	Kenworth
Model	C500B 4x2 D - AB
Tag Number:	2X5632
VIN:	1NK5HSAA5SA06819
Veh. Desc.:	Cement Mixer
Date Aqc.:	June 18, 2014
Acq. Cost:	\$186,570.00

The first step is to determine the cost of the add-on equipment. This is done by subtracting the value of the cab and chassis new, which is found in this guide, from the total acquisition cost of the vehicle.

Total Acquisition Cost:	\$186,570
Less Cab and Chassis:	<u>\$148,600</u>
Cost of Add-on:	\$ 37,970

The second step is to multiply the cost of the add-on equipment by the appropriate composite factor from the Personal Property Composite Factor Table.

Cost of Add-on:	\$37,970
Composite Factor:	<u>x .45</u>
Mkt. Value of Add-on:	\$17,087

Note: Once the cost attributed to the add-on equipment has been determined it is to be listed in Part B of the ADV-40 form each subsequent year and valued using a 10-year economic life.

Example #2 Purchase of a used commercial motor vehicle. (As of October 1, 2021)

Model Year:	2014
Make:	Mack
Model:	MRU613 6X4 D-AB
Tag Number:	4X3724
VIN:	2M2AV98C1LC006171
Veh. Desc.:	Dump Truck 25 Cubic Yd.
Date Aqc.:	May 8, 2016
Acq, Cost:	\$175,450.00

The first step is to determine the depreciated value of the cab & chassis. This is done by multiplying the value of the cab & chassis new, as derived from the Commercial Motor Vehicle Body Valuation Guide, by the appropriate percent good found on the Heavy Truck/Tractor Percent Good Schedule, also found in this guide.

Value of Cab and Chassis New:	\$185,900
Times Percent Good:	<u>x</u> .62
Depreciated Value of Cab and Chassis:	\$115,258

The second step is to subtract the depreciated value of the cab and chassis from the acquisition cost used of the vehicle.

Total Acquisition Cost:	\$175,450
Less Dep. Value of Cab and Chassis:	<u>\$115,258</u>
Used Cost of Add-on:	\$ 60,192

Then multiply the used cost of the add-on equipment by the appropriate composite factor from the Personal Property Composite Factor Table.

Used Cost of Add-on:	\$ 60,192
Composite Factor:	<u>x</u> .66
Mkt. Value of Add-On:	\$39,727

Example #3 Purchase of a used commercial motor vehicle with different original acquisition dates for the cab & chassis and the add-on equipment. (As of October 1, 2021)

Cab & Chassis Model Year:	2013
Equipment Hauler Model Year:	2015
Make:	International
Model:	4300 4x2 D - HB
VIN:	1HTMM2274BG062070
Vehicle Description:	Heavy Duty Industrial Roll Back Equipment Hauler
Acquisition Date:	June 20, 2017
Acquisition Cost:	\$47,250

The first step is to determine the depreciated value of the cab & chassis. This is done by multiplying the value of the cab & chassis new, as derived from the Commercial Motor Vehicle Body Valuation Guide, by the appropriate percent good found on the Heavy Truck/Tractor Percent Good Schedule, also found in this guide.

Cab & Chassis:	\$77,500
Percent Good:	<u>x .46</u>
Depreciated Value of Cab & Chassis:	\$35,650

The second step is to subtract the depreciated value of the cab and chassis from the total acquisition cost used of the vehicle.

Total Acquisition Cost Used:	\$47,250
Less Dep. Value of Cab & Chassis:	<u>\$35,650</u>
Used Cost of Add-on:	\$11,600

Then multiply the used cost of the add-on equipment by the appropriate composite factor from the Personal Property Composite Factor Table.

Used Cost of Add-on:	\$11,600
Composite Factor:	<u>x .75</u>
Mkt. Value of Add-On:	\$ 8,700
